

AJIT NARAYAN JADHAV

Full-Stack Developer | Node.js • React.js • JavaScript

+91 7747923667 | ajit06jadhav@gmail.com | <https://www.linkedin.com/in/ajit-narayan-jadhav-680a1320a> | Ujjain, India

PROFESSIONAL SUMMARY

Full-stack Software Engineer with 4.3 years of experience designing and building web applications using **Node.js, React.js, JavaScript/TypeScript and PHP**. Skilled in REST API development, MySQL/MongoDB database design and query optimization, and responsive UI development. Delivered enterprise-scale platforms used by 500+ business clients across the oil & gas, OTT and CMS domains. Strong fundamentals in data structures, OOP and system design, with a track record of adapting quickly to new technologies.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Java, C, C++

Frontend: React.js, HTML5, CSS3, SCSS, jQuery, Bootstrap 5

Backend: Node.js, Express.js, CodeIgniter 3, REST APIs

Databases: MySQL, MongoDB, Redis

Tools & Practices: Git, AWS (S3), Google Maps API, Mocha, Chai, Data Structures, OOP, System Design

PROFESSIONAL EXPERIENCE

Software Engineer — RWS (India) Pvt. Ltd

Jun 2022 – Present

- Develop and maintain full-stack web modules with Node.js and React.js, integrating third-party REST APIs for enterprise clients.
- Design and optimize MySQL and MongoDB schemas and queries, improving application performance and reliability.
- Build responsive, cross-device UI components using HTML5, CSS3, SCSS and React.js for consistent user experience.
- Own the full delivery cycle — coding, testing, debugging and deployment — across multiple concurrent projects.
- Drove adoption of React.js and API-driven architecture to modernize legacy systems and improve service continuity.

Software Development Intern — Thinking Machines (Training Institute)

Jul 2020 – Mar 2022

- Completed structured training in C, C++, Java, Data Structures, SQL, HTML and CSS, and followed core SDLC practices.
- Built academic projects implementing Linked List, Stack and Queue data structures, plus SQL-backed CRUD applications with HTML/CSS front ends.

KEY PROJECTS

Integrated Ethanol Management System (IEMS) — RWS

2023 – Present

Centralized platform used by 500+ ethanol plants across India for 3 major Oil Marketing Companies — covering plant onboarding, contracts, delivery and GRN processing.

- Designed and built backend APIs and client-side integrations using Node.js, React.js, MySQL and AWS S3.
- Integrated Google Maps API for shortest-distance calculation and logistics optimization.

Tech: Node.js, React.js, MySQL, AWS S3, Git

Lead Management System (LMS) — RWS

2023 – 2025

Multi-site lead capture, tracking and analytics platform integrating several business websites with CMS-driven content management.

- Developed and maintained front-end and back-end modules for multiple business websites using PHP and CodeIgniter.
- Integrated Google Maps API to track leads and log executive visit/travel reports.

Tech: PHP, CodeIgniter, MySQL, HTML, CSS, JavaScript, Git

VOOT — Authentication System

2022 – 2023

Authentication services for a large-scale OTT streaming platform serving millions of users.

- Built secure, scalable authentication APIs using Node.js, MongoDB and Redis, ensuring high availability and compliance with industry standards.

Tech: Node.js, MongoDB, Redis

EDUCATION

Bachelor of Technology — Ujjain Engineering College

2018 – 2022
